

Liquid Railway Biokleen

A NEW TECHNOLOGY
LOCOMOTIVE AND PARTS WASH

DESCRIPTION:

A new generation of heavy-duty biodegradable, non caustic, non acid and non solvent locomotive and parts cleaner designed to remove dirt film, grease and exhaust deposits. Efficiently cleans without emulsification. Highly concentrated environmentally friendly.

BENEFITS:

- **Biodegradable Non-corrosive Technology** A non caustic, non acid, non corrosive and non solvent blend that contains high levels of wetting agents, surfactants and water softeners. Innovatively depolarizes surface and loosens dirt, film and grease.
- **Unique** An Efficient blend designed to remove dirt, grease, grime, exhaust deposits as well as.
- **Environmentally Safe** Contains no caustic, acids, solvents, phosphates or phosphate derivatives. Ideal for open application and for shops with no effluent treatment plant.
- **Non Emulsifying**
 - 1) Does not emulsify hydrocarbons into aqueous phase. Does not require any effluent treatment.
 - 2) Works by lifting up oil, grease, dirt and grime rather than emulsifying them.
 - 3) Achieves oil and aqueous separation within seconds without compromising product efficiency.
 - 4) Ideal for open system washing.
- **Economical** Is a highly concentrated non-emulsifying technology that allows for very high dilution ratio at use point (see application), and contrary to other locomotive cleaners, does not require any effluent treatment as soil removal is achieved via induced electrostatic repulsion that removes soil rather than emulsifying it.

Liquid Railway Biokleen

DIRECTIONS FOR USE:

A highly concentrated product to be mixed with up to 33 parts of water for efficient exterior locomotive cleaning. Apply to dry surface for optimum results

For optimum results, consult your local **Sentinel Canada's** Representative.

SPECIFICATIONS:

APPERANCE	CLEAN BLUE LIQUID
CAUSTIC CONTENT	NIL
WATER SOLUBILITY	IMMEDIATE, 100%
SPECIFIC GRAVITY	1.14
SHELF LIFE	1 YEAR MINIMUM

VALUE ADDED:

Besides being a non-corrosive, safe and efficient technology, **Liquid Railway Biokleen** also does not require any effluent treatment. Ideal for all types of wash facilities.
